

In my area (Lexington, Kentucky) I listen to K-Love on FM-89.9 and to AIR-1 on FM-95.3. These are Christian music stations that provide thoughtful uplifting music to the local Lexington area. They are non-commercial and very different from much of the other radio stations in the area. They provide news of Christian events in the area that I would not even know about otherwise, and they provide calming music during my daily commute. It is definately a public service to provide calming music to people who are driving! Seriously, their positive message is good any time of the day or night. People can get a positive message from these radio stations that they might not get EVER if they aren't church-goers or have family members who are. Please do not let any Low Power FM signals block any of the FM translators that Air-1 or K-Love are using. Thank you very much.
